Before the Filing of an Appeal Brief	Examiner	Art Unit				
	José R. Díaz	2815				
The MAILING DATE of this communication appe	ars on the cover sheet with the o	orrespondence add	ress			
THE REPLY FILED 02 November 2005 FAILS TO PLACE THI	S APPLICATION IN CONDITION F	FOR ALLOWANCE.				
1. The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:						
 a) The period for reply expiresmonths from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. 						
Examiner Note: If box 1 is checked, check either box (a) or (b) MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f	Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).					
Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). NOTICE OF APPEAL						
2. The Notice of Appeal was filed on A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a). AMENDMENTS						
3. The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will <u>not</u> be entered because (a) They raise new issues that would require further consideration and/or search (see NOTE below);						
 (b) ☐ They raise the issue of new matter (see NOTE below (c) ☐ They are not deemed to place the application in beauting appeal; and/or 	tter form for appeal by materially r		the issues for			
(d) They present additional claims without canceling a NOTE: (See 37 CFR 1.116 and 41.33(a))						
 4. The amendments are not in compliance with 37 CFR 1. 5. Applicant's reply has overcome the following rejection(s) 		ompliant Amendment	: (PTOL-324).			
 Newly proposed or amended claim(s) would be a the non-allowable claim(s). 						
7. For purposes of appeal, the proposed amendment(s): a) will not be entered, or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows:						
Claim(s) allowed: Claim(s) objected to: Claim(s) rejected:						
Claim(s) withdrawn from consideration: AFFIDAVIT OR OTHER EVIDENCE						
8. The affidavit or other evidence filed after a final action, because applicant failed to provide a showing of good an and was not earlier presented. See 37 CFR 1.116(e).	ut before or on the date of filing a land sufficient reasons why the affida	Notice of Appeal will <u>r</u> wit or other evidence	<u>10t</u> be entered is necessary			
9. The affidavit or other evidence filed after the date of filing a Notice of Appeal, but prior to the date of filing a brief, will <u>not</u> be entered because the affidavit or other evidence failed to overcome <u>all</u> rejections under appeal and/or appellant fails to provide a showing a good and sufficient reasons why it is necessary and was not earlier presented. See 37 CFR 41.33(d)(1).						
10. The affidavit or other evidence is entered. An explanation of the status of the claims after entry is below or attached. REQUEST FOR RECONSIDERATION/OTHER

			H PARKER EXAMINER			

Continuation of 11. does NOT place the application in condition for allowance because: the combinations of references make obvious the claimed invention.

Applicant argues that Floyd does not overcome the deficiencies of Bergstrom since Floyd fails to teach a visual element formed on the substrate. However, the examiner disagrees. Floyd, as stated in the previous rejection, does teach the formation of a visual element on a substrate [fig. 1]. The fact that the visual element of Floyd is formed on an additional substrate is irrelevant since the claimed limitations do not limit the invention to a specific configuration. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See In re Van Geuns, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Thus, Floyd does overcome the deficiencies of Bergstrom.

In addition, Applicant argues that Floyd does not teach the limitations recited in claims 25 and 26, which involve a visual image of the condition sensed by the MEM element formed on the substrate. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See In re Keller, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); In re Merck & Co., 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). In the instance case, Bergstrom teaches a MEM sensing element and Floyd teaches the integration of a visual element (e.g. LED's) to a substrate such as the one taught by Bergstrom. Thus, the combination of references clearly results in a visual element integrated to a MEM sensing element, which is capable of producing a visual image of a sensed condition as required by the claimed invention. Finally, applicant attacks the combination of Bergstrom and Floyd, stating that the Floyd patent appears to teach away form being combined with the Bergstrom patent. However, as pointed out above, this argument is not persuasive since the fact that Floyd teaches an additional configuration does not mean that it is teaching away. As such, the rejections are considered to be proper.
